Col. A. E. Gooderham,
Managing Director,
British Acetones Toronto, Ltd.,
Toronto, Ont.

Dear Sir:

A number of Toronto University undergraduates employed as chemists in my laboratory have been granted permission by the University Council to continue their courses during their off-time, and I have arranged as far as possible that any such students should be on night duty.

I should be glad to know whether, if the British Government consider it expedient to continue the manufacture of solvent at British Acetones for some months after declaration of peace, these students will still be permitted to continue their courses whilst in our employ.

Yours very truly,

DAL/MED.
